SUMMARY

Entry-level Cybersecurity professional with a strong foundation in networking, system administration, and security operations. Skilled in threat detection, vulnerability assessment, and incident response using tools like Splunk and Wazuh. Certified in CEH, CCNA, MCSE, and Linux Administration, with hands-on experience in SIEM deployment and attack simulations. Seeking SOC Analyst and broader cybersecurity opportunities.

DOMAIN KNOWLEDGE

Networking: OSI & TCP/IP models, Subnetting, Routing & Switching (OSPF, EIGRP, RIP, BGP), VLANs, ACLs, NAT/PAT, STP, DNS, DHCP, FTP, SMTP, SSH, Cisco ASA 5500 Firewall.

Windows Server: ADDS, Group Policy (GPOs), DHCP, IIS Web Server management, Security configurations.

Linux: User management, File system operations, Apache, Nginx, Samba, FTP, SSH, Firewalls (iptables, ufw).

Cybersecurity: CIA Triad, Cyber Kill Chain, MITRE ATT&CK, AAA, Incident Response Lifecycle, SOC Workflows, SIEM log monitoring (Splunk, Wazuh), Vulnerability scanning (Nmap, Nessus, OpenVAS, Nikto), OWASP Top 10, Malware, Phishing.

CERTIFICATIONS

- **A+ & N+** (Basics of Computer Hardware and Networking) – Prompt Infotech, Jan 2025
- **CCNA** (Routing & Switching) – Prompt Infotech, Mar 2025
- **MCSE** (Microsoft Certified Solutions Expert) – Prompt Infotech, Apr 2025
- **Linux Fundamentals** – Prompt Infotech, Jul 2025
- **CEH** (Certified Ethical Hacking) – Prompt Infotech, Jul 2025
- **Web Application Security** (Internship) – Skill Horizon Pvt Ltd, Sep 2025
- **SOC Foundations for Beginners** – SIEM XPERT via Udemy, May 2026

TECHNICAL SKILLS

Networking:	Cisco Packet Tracer
Server Administration:	Microsoft Windows Server 2019
Linux Services:	Apache, Nginx, FTP, Samba, SSH
Operating Systems:	Windows 7, 8, 10, 11, Kali Linux, Ubuntu
Programming Languages:	Basics of Python, Bash, SQL
Security Tools:	Nmap, Wireshark, Metasploit, Burp Suite, Netcat, Nessus
Threat Hunting Tools:	Mandiant IOC Editor, Redline
Endpoint Security:	Familiar with EDR/XDR Solutions
SIEM Tools:	Splunk, Wazuh
Network Security:	Cisco ASA 5500 Firewall, IDS/IPS Concepts

PROJECTS

Wazuh SIEM Deployment and SSH Brute-Force Detection using Custom Rules Home Lab

- Built a home lab with a Wazuh server, Windows 10 OpenSSH target, and Kali Linux attacker system.
- Developed custom Wazuh rules to detect failed SSH logins and correlate brute-force attacks using frequency/timeframe conditions.
- Customized `local_rules.xml` and mapped detections to MITRE ATT&CK technique T1110 (Brute Force).

SSH Log Analyzer and Brute-Force Detection Script Python Project

- Developed a Python-based log analyzer to parse SSH authentication logs and identify brute-force activity.
- Implemented regex-based extraction of timestamps and source IPs, with sliding-window logic to flag IPs exceeding a configurable threshold.
- Generated CSV reports and visualized top offending IP addresses using Pandas and Matplotlib.

EDUCATION

2021 – 2024 B.Com with Computer Applications at **Sasurie College of Arts & Science** (CGPA: 7.8/10)
